

beta-Amyloid Peptide (1-40) (human)

概述

产品名称	beta-Amyloid多肽(1-40) (human)
产品编号	TD-BP029746
CAS编号	131438-79-4

性能

分子量	4329.80
分子式	C ₁₉₄ H ₂₉₅ N ₅₃ O ₅₈ S
序列	DAEFRHDSGYEVHHQKLVFFAEDVGSNKGAIIGLMVGGVV
UniProt登记号	P05067
存放说明	Store at -20°C. Store under desiccating conditions. The product can be stored for up to 12 months.
溶解度概述	Solubility is batch-dependent. Please refer to the Protocol Booklet and the batch-specific CoA for more information.
处理	<p>This product is supplied in one (or more) pack size which is freeze dried. Therefore the contents may not be readily visible, as they can coat the bottom or walls of the vial.</p> <p>Solvents listed may be unsuitable for use in biological experiments. These solvents are intended to enable solubilisation and mixing of components. We recommend that biologically unsuitable solvents are removed prior to solubilisation in experimental media.</p> <p>Wherever possible, you should prepare and use solutions on the same day. However, if you need to make up stock solutions in advance, we recommend that you store the solution as aliquots in tightly sealed vials at -20°C. Generally, these will be useable for up to one week. Before use, and prior to opening the vial we recommend that you allow your product to equilibrate to room temperature for at least 1 hour.</p> <p>Amyloid β (1-40) human peptide should be initially dissolved according to this method: Add a small amount of 1% NH₄OH directly to the lyophilized solid (50-100 μl should be sufficient for 1mg of peptide) Dilute to a concentration of 1mg/ml or less with your buffer. Vortex gently to mix (less than 1 minute). The peptide cannot be stored long term in 1% NH₄OH, therefore it is important to immediately dilute the NH₄OH/peptide solution with PBS or other buffer to a concentration of 1 mg/ml.</p>
